Re: Veterinary Task Force on Feline Sterilization

TICA®-The International Cat Association®, Inc is proud to endorse the recommendation put forward by the Veterinary Task Force on Feline Sterilization. TICA has a long history of encouraging education to support early spay and neuter of pet companion cats not part of a planned program to preserve pedigreed breeds. TICA is the largest registry of Household Pet Cats, i.e. cats of unknown ancestry, of which all are required to be sterilized.

The recommendation of the Feline Sterilization Task Force will aid in education of pet owning public and provide veterinaries with a consistent message. This will hopefully increase compliance of recommendation to spay and neuter by five months thus reducing risk of relinquishment or unwanted kittens from accidental litters.

Sincerely,

*Roeann Fulkerson*
